I'm a Backend Developer with a solid background in Node.js and PHP, passionate about building scalable web applications and clean, reliable APIs. I've built a complete solution for a real-world management problem using PHP and MySQL, which helped sharpen my problem-solving and system design skills. I'm a fast learner, detail-oriented, and excited to contribute to impactful, enterprise-level software – while actively growing my expertise in AI and modern backend technologies.

Skills

Programming Languages

1. JavaScript(ES6+)
2. Java
3. PHP

Databases

1. MySQL
2. MongoDB
 - Query Optimization, Joins, Aggregation, Schema Design

Certificates

1. Full-Stack Web Development
2. React JS
3. Python
4. NodeJS Advance

Backend Technologies

1. NodeJS
2. Express.js
3. REST APIs
4. Middleware
5. JWT

Tools & Utilities

1. Git & GitHub, Postman, VS Code, XAMPP
2. API Testing, Debugging, Version Control

Extras

1. UI/UX Figma

Projects

Smart Mobile App – Mobile Shop Management System

Tech Stack: PHP, MySQL, Bootstrap

- Built a complete inventory and sales management system for a mobile shop.
- Developed modules for purchase, sales, return handling, billing, and customer records.
- Designed and optimized MySQL database for real-time data flow and reporting.
- Successfully deployed and delivered to a real client for ₹10,000.

Meat Hub – Restaurant & Meat Shop Management System

Tech Stack: Node.js, Express.js, MySQL

- Developed a modular RESTful backend using Node.js and Express for handling restaurant and meat shop operations.
- Implemented APIs for order management, stock tracking, sales reports, and user roles.
- Integrated MySQL for structured data management with focus on performance and query optimization.
- Designed scalable architecture to handle shop billing, inventory, and admin panels.

Travel Hunter – Tourism Mobile App

Tech Stack: **Java , Firebase , Android Studio**

- Developed a mobile app that provides a complete tourism experience, including travel guides, hotel bookings, and location-based alerts.
- Implemented user authentication and security features to ensure data protection and safe access.
- Integrated real-time danger zone alerts using location services and external travel advisory APIs.
- Designed intuitive UI and managed backend logic for hotel booking workflows and travel itinerary planning.

Experience

Projects Delivered:

- **Smart Mobile App (PHP + MySQL)** – Delivered a complete mobile shop management system with Specific features required to **PURCHASE SELL and RETURN** old mobile phones.
- **Earned 10k**
- **Meat Hub (Node.js + MySQL)** – Built RESTful backend for restaurant and meat shop operations with Express.js, handling **API's FOR ORDERS, STOCK, and ADMIN PANEL.**
- **Earned 15K**
- Collaborated with clients to gather requirements, deploy solutions, and provide post-delivery support.
- Focused on clean backend architecture, database optimization, and secure API development.

Education

Senior Secondary School

Score : 88.4%

2022

Chandigarh University

Score : 7.6 CGPA

2025

- Bachelor of Computer Applications
- CGPA: 7.6

Professional Statement

To secure a **backend development role** where I can apply my hands-on experience in building real-world applications. I've invested time in learning, building, and delivering systems independently, and I'm now ready to grow within a professional team and contribute to scalable, real-time solutions.
